Volume C | Excel Workbook and 191-Worksheet User Guide

This manual guides preparation and proposed future work. It is not an instruction from PSS, a delegation of authority, a regulatory opinion, or proof of a completed validation.

DECISION LIMIT: Before formal appointment and written authority, do not represent PSS, engage banks as PSS, request internal data, issue RFIs, touch live transactions, or approve expenditure.

1 Workbook safety rules

- The existing Master Library contains 16 programme workbooks with 179 worksheets plus the 12-sheet Master Control workbook: 17 workbooks / 191 worksheets total.
- Open a COPY, not the canonical .xlsx. Save date, editor, original hash and purpose in Change Control.
- Use descriptive ID references and exact units/currency/periods. Prefer a source locator over copying confidential records into a broadly shared register.
- Never overwrite prebuilt formulas, computed dashboards, hidden gates or historical source columns. If a formula is wrong, document a controlled repair and independently test it.
- Blank = evidence absent; Pending = activity not completed. Neither is equivalent to zero cost, zero demand, a Pass, or not applicable.
- Use real NBE/PCI/INSA/consumer/contract documentation with dated scope reviews where relevant; public standards do not replace certificates or licences.
- Where there is a status dropdown, use allowed values. If a dropdown is absent, use the workbook's established vocabulary and avoid custom completion labels.

2 Exact workbook inventory and tabs

The following tab labels were extracted from the actual .xlsx package files; instructions are operational commentary, not descriptions of existing populated evidence. Use the workbook's own Read Me sheet and header row as primary field definitions.

Workbook 01 — 03_Master_Programme_Control_and_Readiness_Register_v1.xlsx

Location: 00_Start_Here/03_Master_Programme_Control_and_Readiness_Register_v1.xlsx

Actual sheet name	How to use this worksheet
Read Me	START HERE: follow sheet guidance and input conventions; preserve this tab unchanged unless version-controlled.
Dashboard	READ ONLY: review counts and warnings after updating linked registers; compare with raw evidence; do not type over calculated indicators.
Package Index	Review the existing field labels; record dated factual evidence, explicit assumptions and open questions without overriding formulas or sign-offs.
File Manifest	Review the existing field labels; record dated factual evidence, explicit assumptions and open questions without overriding formulas or sign-offs.
Audit Findings	Update status, owner, due date, supporting document ID and independent reviewer; store sensitive originals only in approved PSS repositories, not the personal research archive.

Actual sheet name	How to use this worksheet
Evidence Gates	For each existing gate, locate original proof and independent owner; move from Pending only after documentary review; a dashboard percentage cannot waive a hard stop.
Joining Workplan	Update status, owner, due date, supporting document ID and independent reviewer; store sensitive originals only in approved PSS repositories, not the personal research archive.
Dependencies	Review the existing field labels; record dated factual evidence, explicit assumptions and open questions without overriding formulas or sign-offs.
Source Refresh	Record exact primary/public URL or approved document reference, retrieval date, issuer, version, scope, and claim supported; revisit at decision time.
Change Control	Update status, owner, due date, supporting document ID and independent reviewer; store sensitive originals only in approved PSS repositories, not the personal research archive.
Historical Archive	Review the existing field labels; record dated factual evidence, explicit assumptions and open questions without overriding formulas or sign-offs.
Decision Log	After authority is confirmed, record decision ID, authorised reviewer, dated disposition, evidence link and remaining conditions; never invent a signature.

Workbook 02 — S02_Options_Scoring_and_Evidence_Workbook_v1.xlsx

Location: 01_Strategy_and_Governance/S02/S02_Options_Scoring_and_Evidence_Workbook_v1.xlsx

Actual sheet name	How to use this worksheet
Scoring	Score only with evidence at a common level of scrutiny; keep no-build as an alternative and mandatory eligibility gates separate from weighted ratings.
Sensitivity	Score only with evidence at a common level of scrutiny; keep no-build as an alternative and mandatory eligibility gates separate from weighted ratings.
Hard_Gates	For each existing gate, locate original proof and independent owner; move from Pending only after documentary review; a dashboard percentage cannot waive a hard stop.
Evidence_Map	Update status, owner, due date, supporting document ID and independent reviewer; store sensitive originals only in approved PSS repositories, not the personal research archive.
Executive_View	READ ONLY: review counts and warnings after updating linked registers; compare with raw evidence; do not type over calculated indicators.
Sources	Record exact primary/public URL or approved document reference, retrieval date, issuer, version, scope, and claim supported; revisit at decision time.

Workbook 03 — PSS_A360_Master_Control_and_Evidence_Registers.xlsx

Location: 01_Strategy_and_Governance/S04_V01/PSS_A360_Master_Control_and_Evidence_Registers.xlsx

Actual sheet name	How to use this worksheet
Dashboard	READ ONLY: review counts and warnings after updating linked registers; compare with raw evidence; do not type over calculated indicators.

Actual sheet name	How to use this worksheet
Document Register	Update status, owner, due date, supporting document ID and independent reviewer; store sensitive originals only in approved PSS repositories, not the personal research archive.
Gap Register	Update status, owner, due date, supporting document ID and independent reviewer; store sensitive originals only in approved PSS repositories, not the personal research archive.
Hypothesis Tests	Record test preconditions, authorised synthetic/controlled dataset, expected vs actual result, trace, tester, retest and sign-off. No executed test = Pending, not Pass.
Data Requests	Update status, owner, due date, supporting document ID and independent reviewer; store sensitive originals only in approved PSS repositories, not the personal research archive.
Evidence Index	Update status, owner, due date, supporting document ID and independent reviewer; store sensitive originals only in approved PSS repositories, not the personal research archive.
Gate Controls	For each existing gate, locate original proof and independent owner; move from Pending only after documentary review; a dashboard percentage cannot waive a hard stop.
RACI	Use to propose responsibilities/service levels; validate with PSS and bank process owners, record version and sign-off; customer/settlement accountability stays with authorised institutions.
Decision Log	After authority is confirmed, record decision ID, authorised reviewer, dated disposition, evidence link and remaining conditions; never invent a signature.
Feasibility Budget	Review the existing field labels; record dated factual evidence, explicit assumptions and open questions without overriding formulas or sign-offs.

Workbook 04 — V02_Market_Evidence_Competitor_Opportunity_Workbook_v1.xlsx

Location: 02_Research_and_Validation/V02/V02_Market_Evidence_Competitor_Opportunity_Workbook_v1.xlsx

Actual sheet name	How to use this worksheet
Dashboard	READ ONLY: review counts and warnings after updating linked registers; compare with raw evidence; do not type over calculated indicators.
Market Indicators	Enter date-stamped market/competitor evidence, preserve original denominators and geography, mark hypotheses and counterevidence; do not convert national counts directly to contracted bank revenue.
Ecosystem Competition	Enter date-stamped market/competitor evidence, preserve original denominators and geography, mark hypotheses and counterevidence; do not convert national counts directly to contracted bank revenue.
Opportunity Tests	Record test preconditions, authorised synthetic/controlled dataset, expected vs actual result, trace, tester, retest and sign-off. No executed test = Pending, not Pass.
Bottom Up Revenue	EDIT ONLY substantiated input cells; provide source/owner and units (ETB, month, bank). Keep formula cells intact and blank outputs when evidence is absent; have Finance independently reconcile and stress.

Actual sheet name	How to use this worksheet
Regional Screen	Enter date-stamped market/competitor evidence, preserve original denominators and geography, mark hypotheses and counterevidence; do not convert national counts directly to contracted bank revenue.
Sources	Record exact primary/public URL or approved document reference, retrieval date, issuer, version, scope, and claim supported; revisit at decision time.
Action Handoff	Use to propose responsibilities/service levels; validate with PSS and bank process owners, record version and sign-off; customer/settlement accountability stays with authorised institutions.

Workbook 05 — V03_Bank_Research_Evidence_Pricing_and_Sponsor_Register_v1.xlsx

Location: 02_Research_and_Validation/V03/V03_Bank_Research_Evidence_Pricing_and_Sponsor_Register_v1.xlsx

Actual sheet name	How to use this worksheet
Instructions	START HERE: follow sheet guidance and input conventions; preserve this tab unchanged unless version-controlled.
Bank Pipeline	Only after outreach approval/consent: log anonymised interview or test ID, participant category, actual quote/observation, source, date and evidence strength; do not enter fictional responses.
Interview Log	Only after outreach approval/consent: log anonymised interview or test ID, participant category, actual quote/observation, source, date and evidence strength; do not enter fictional responses.
Hypothesis Register	Update status, owner, due date, supporting document ID and independent reviewer; store sensitive originals only in approved PSS repositories, not the personal research archive.
Buyer Evidence	Only after outreach approval/consent: log anonymised interview or test ID, participant category, actual quote/observation, source, date and evidence strength; do not enter fictional responses.
Pricing and ROI	EDIT ONLY substantiated input cells; provide source/owner and units (ETB, month, bank). Keep formula cells intact and blank outputs when evidence is absent; have Finance independently reconcile and stress.
Sponsor Tracker	Only after outreach approval/consent: log anonymised interview or test ID, participant category, actual quote/observation, source, date and evidence strength; do not enter fictional responses.
Data Requests	Update status, owner, due date, supporting document ID and independent reviewer; store sensitive originals only in approved PSS repositories, not the personal research archive.
Options Comparators	Score only with evidence at a common level of scrutiny; keep no-build as an alternative and mandatory eligibility gates separate from weighted ratings.
QA and Gate	For each existing gate, locate original proof and independent owner; move from Pending only after documentary review; a dashboard percentage cannot waive a hard stop.
Dashboard	READ ONLY: review counts and warnings after updating linked registers; compare with raw evidence; do not type over calculated indicators.

Workbook 06 — V04_Merchant_Evidence_and_Concept_Validation_Register_v1.xlsx

Location: 02_Research_and_Validation/V04/V04_Merchant_Evidence_and_Concept_Validation_Register_v1.xlsx

Actual sheet name	How to use this worksheet
Dashboard	READ ONLY: review counts and warnings after updating linked registers; compare with raw evidence; do not type over calculated indicators.
Quotas	Review the existing field labels; record dated factual evidence, explicit assumptions and open questions without overriding formulas or sign-offs.
Recruitment	Only after outreach approval/consent: log anonymised interview or test ID, participant category, actual quote/observation, source, date and evidence strength; do not enter fictional responses.
InterviewNotes	Only after outreach approval/consent: log anonymised interview or test ID, participant category, actual quote/observation, source, date and evidence strength; do not enter fictional responses.
PainMatrix	Review the existing field labels; record dated factual evidence, explicit assumptions and open questions without overriding formulas or sign-offs.
ConceptTests	Only after outreach approval/consent: log anonymised interview or test ID, participant category, actual quote/observation, source, date and evidence strength; do not enter fictional responses.
Hypotheses	Review the existing field labels; record dated factual evidence, explicit assumptions and open questions without overriding formulas or sign-offs.
Evidence	Update status, owner, due date, supporting document ID and independent reviewer; store sensitive originals only in approved PSS repositories, not the personal research archive.
Approvals	After authority is confirmed, record decision ID, authorised reviewer, dated disposition, evidence link and remaining conditions; never invent a signature.
ActionLog	Update status, owner, due date, supporting document ID and independent reviewer; store sensitive originals only in approved PSS repositories, not the personal research archive.
Sources	Record exact primary/public URL or approved document reference, retrieval date, issuer, version, scope, and claim supported; revisit at decision time.
V02Change	Review the existing field labels; record dated factual evidence, explicit assumptions and open questions without overriding formulas or sign-offs.

Workbook 07 — P01_Requirements_Traceability_and_Acceptance_Workbook_v1.xlsx

Location:
03_Product_and_Operating_Design/P01/P01_Requirements_Traceability_and_Acceptance_Workbook_v1.xlsx

Actual sheet name	How to use this worksheet
Dashboard	READ ONLY: review counts and warnings after updating linked registers; compare with raw evidence; do not type over calculated indicators.
Service Catalogue	Confirm exact P01/P02 requirement ID, actual ownership and interface permission; document current vs proposed, test criteria, security scope and unresolved decisions.
Functional	Confirm exact P01/P02 requirement ID, actual ownership and interface permission; document current vs proposed, test criteria, security scope and unresolved decisions.

Actual sheet name	How to use this worksheet
NonFunctional	Confirm exact P01/P02 requirement ID, actual ownership and interface permission; document current vs proposed, test criteria, security scope and unresolved decisions.
Interfaces	Confirm exact P01/P02 requirement ID, actual ownership and interface permission; document current vs proposed, test criteria, security scope and unresolved decisions.
Acceptance Tests	Record test preconditions, authorised synthetic/controlled dataset, expected vs actual result, trace, tester, retest and sign-off. No executed test = Pending, not Pass.
Journeys	Confirm exact P01/P02 requirement ID, actual ownership and interface permission; document current vs proposed, test criteria, security scope and unresolved decisions.
Personas	Confirm exact P01/P02 requirement ID, actual ownership and interface permission; document current vs proposed, test criteria, security scope and unresolved decisions.
Gates and Issues	For each existing gate, locate original proof and independent owner; move from Pending only after documentary review; a dashboard percentage cannot waive a hard stop.
Sources	Record exact primary/public URL or approved document reference, retrieval date, issuer, version, scope, and claim supported; revisit at decision time.
Data Dictionary	Confirm exact P01/P02 requirement ID, actual ownership and interface permission; document current vs proposed, test criteria, security scope and unresolved decisions.
Pilot SLO Inputs	EDIT ONLY substantiated input cells; provide source/owner and units (ETB, month, bank). Keep formula cells intact and blank outputs when evidence is absent; have Finance independently reconcile and stress.

Workbook 08 — P02_Integration_Decision_and_Test_Registers_v1.xlsx

Location: 03_Product_and_Operating_Design/P02/P02_Integration_Decision_and_Test_Registers_v1.xlsx

Actual sheet name	How to use this worksheet
Components	Confirm exact P01/P02 requirement ID, actual ownership and interface permission; document current vs proposed, test criteria, security scope and unresolved decisions.
Interfaces	Confirm exact P01/P02 requirement ID, actual ownership and interface permission; document current vs proposed, test criteria, security scope and unresolved decisions.
EventFields	Confirm exact P01/P02 requirement ID, actual ownership and interface permission; document current vs proposed, test criteria, security scope and unresolved decisions.
States	Confirm exact P01/P02 requirement ID, actual ownership and interface permission; document current vs proposed, test criteria, security scope and unresolved decisions.
Controls	Update status, owner, due date, supporting document ID and independent reviewer; store sensitive originals only in approved PSS repositories, not the personal research archive.
Threats	Enter contradictory evidence and possible failure mechanisms; assign a proposed owner; separate inherent risk, actual controls, residual assessment and management response.

Actual sheet name	How to use this worksheet
ADRs	Confirm exact P01/P02 requirement ID, actual ownership and interface permission; document current vs proposed, test criteria, security scope and unresolved decisions.
Tests	Record test preconditions, authorised synthetic/controlled dataset, expected vs actual result, trace, tester, retest and sign-off. No executed test = Pending, not Pass.
P01_Trace	Review the existing field labels; record dated factual evidence, explicit assumptions and open questions without overriding formulas or sign-offs.
EvidenceRequests	Update status, owner, due date, supporting document ID and independent reviewer; store sensitive originals only in approved PSS repositories, not the personal research archive.
Sources	Record exact primary/public URL or approved document reference, retrieval date, issuer, version, scope, and claim supported; revisit at decision time.
Read Me & Dashboard	READ ONLY: review counts and warnings after updating linked registers; compare with raw evidence; do not type over calculated indicators.

Workbook 09 — P03_Operating_RACI_Service_and_Control_Registers_v1.xlsx

Location: 03_Product_and_Operating_Design/P03/P03_Operating_RACI_Service_and_Control_Registers_v1.xlsx

Actual sheet name	How to use this worksheet
RACI	Use to propose responsibilities/service levels; validate with PSS and bank process owners, record version and sign-off; customer/settlement accountability stays with authorised institutions.
Processes	Use to propose responsibilities/service levels; validate with PSS and bank process owners, record version and sign-off; customer/settlement accountability stays with authorised institutions.
SLAs_OLAs	Use to propose responsibilities/service levels; validate with PSS and bank process owners, record version and sign-off; customer/settlement accountability stays with authorised institutions.
Incident Matrix	Use to propose responsibilities/service levels; validate with PSS and bank process owners, record version and sign-off; customer/settlement accountability stays with authorised institutions.
Controls	Update status, owner, due date, supporting document ID and independent reviewer; store sensitive originals only in approved PSS repositories, not the personal research archive.
KPIs	Use to propose responsibilities/service levels; validate with PSS and bank process owners, record version and sign-off; customer/settlement accountability stays with authorised institutions.
Staffing	Use to propose responsibilities/service levels; validate with PSS and bank process owners, record version and sign-off; customer/settlement accountability stays with authorised institutions.

Actual sheet name	How to use this worksheet
Handoffs	Use to propose responsibilities/service levels; validate with PSS and bank process owners, record version and sign-off; customer/settlement accountability stays with authorised institutions.
Open Decisions	Review the existing field labels; record dated factual evidence, explicit assumptions and open questions without overriding formulas or sign-offs.
Evidence Requests	Update status, owner, due date, supporting document ID and independent reviewer; store sensitive originals only in approved PSS repositories, not the personal research archive.
Sources	Record exact primary/public URL or approved document reference, retrieval date, issuer, version, scope, and claim supported; revisit at decision time.
Dashboard	READ ONLY: review counts and warnings after updating linked registers; compare with raw evidence; do not type over calculated indicators.

Workbook 10 — P04_Sourcing_Options_Evidence_TCO_and_Contract_Registers_v1.xlsx

Location:
03_Product_and_Operating_Design/P04/P04_Sourcing_Options_Evidence_TCO_and_Contract_Registers_v1.xlsx

Actual sheet name	How to use this worksheet
Strategies	Score only with evidence at a common level of scrutiny; keep no-build as an alternative and mandatory eligibility gates separate from weighted ratings.
Work Packages	Review the existing field labels; record dated factual evidence, explicit assumptions and open questions without overriding formulas or sign-offs.
Criteria	Score only with evidence at a common level of scrutiny; keep no-build as an alternative and mandatory eligibility gates separate from weighted ratings.
Hard Gates	For each existing gate, locate original proof and independent owner; move from Pending only after documentary review; a dashboard percentage cannot waive a hard stop.
Scoring	Score only with evidence at a common level of scrutiny; keep no-build as an alternative and mandatory eligibility gates separate from weighted ratings.
RFI Register	Update status, owner, due date, supporting document ID and independent reviewer; store sensitive originals only in approved PSS repositories, not the personal research archive.
Vendor Register	Update status, owner, due date, supporting document ID and independent reviewer; store sensitive originals only in approved PSS repositories, not the personal research archive.
TCO 5yr	EDIT ONLY substantiated input cells; provide source/owner and units (ETB, month, bank). Keep formula cells intact and blank outputs when evidence is absent; have Finance independently reconcile and stress.
Risk Register	Enter contradictory evidence and possible failure mechanisms; assign a proposed owner; separate inherent risk, actual controls, residual assessment and management response.
Contract Checklist	Update status, owner, due date, supporting document ID and independent reviewer; store sensitive originals only in approved PSS repositories, not the personal research archive.

Actual sheet name	How to use this worksheet
Task Notebook	Review the existing field labels; record dated factual evidence, explicit assumptions and open questions without overriding formulas or sign-offs.
Source Register	Record exact primary/public URL or approved document reference, retrieval date, issuer, version, scope, and claim supported; revisit at decision time.
Dashboard	READ ONLY: review counts and warnings after updating linked registers; compare with raw evidence; do not type over calculated indicators.

Workbook 11 — F01_Integrated_Evidence_Gates_Options_and_Decision_Workbook_v1.xlsx

Location:
04_Feasibility_and_Assurance/F01/F01_Integrated_Evidence_Gates_Options_and_Decision_Workbook_v1.xlsx

Actual sheet name	How to use this worksheet
Read First	Review the existing field labels; record dated factual evidence, explicit assumptions and open questions without overriding formulas or sign-offs.
Dashboard	READ ONLY: review counts and warnings after updating linked registers; compare with raw evidence; do not type over calculated indicators.
Synthesis	Review the existing field labels; record dated factual evidence, explicit assumptions and open questions without overriding formulas or sign-offs.
Decision Gates	For each existing gate, locate original proof and independent owner; move from Pending only after documentary review; a dashboard percentage cannot waive a hard stop.
Evidence Backlog	Update status, owner, due date, supporting document ID and independent reviewer; store sensitive originals only in approved PSS repositories, not the personal research archive.
Strategic Options	Score only with evidence at a common level of scrutiny; keep no-build as an alternative and mandatory eligibility gates separate from weighted ratings.
Risks & Reversals	Enter contradictory evidence and possible failure mechanisms; assign a proposed owner; separate inherent risk, actual controls, residual assessment and management response.
Joining Action Plan	Update status, owner, due date, supporting document ID and independent reviewer; store sensitive originals only in approved PSS repositories, not the personal research archive.
Decision Log	After authority is confirmed, record decision ID, authorised reviewer, dated disposition, evidence link and remaining conditions; never invent a signature.
Document Crosswalk	Review the existing field labels; record dated factual evidence, explicit assumptions and open questions without overriding formulas or sign-offs.
Approval Record	After authority is confirmed, record decision ID, authorised reviewer, dated disposition, evidence link and remaining conditions; never invent a signature.
External Sources	Record exact primary/public URL or approved document reference, retrieval date, issuer, version, scope, and claim supported; revisit at decision time.

Workbook 12 — F02_Technical_Test_Risk_and_Evidence_Registers_v1.xlsx

Location: 04_Feasibility_and_Assurance/F02/F02_Technical_Test_Risk_and_Evidence_Registers_v1.xlsx

Actual sheet name	How to use this worksheet
Dashboard	READ ONLY: review counts and warnings after updating linked registers; compare with raw evidence; do not type over calculated indicators.
Instructions	START HERE: follow sheet guidance and input conventions; preserve this tab unchanged unless version-controlled.
Test_Cases	Record test preconditions, authorised synthetic/controlled dataset, expected vs actual result, trace, tester, retest and sign-off. No executed test = Pending, not Pass.
Hard_Gates	For each existing gate, locate original proof and independent owner; move from Pending only after documentary review; a dashboard percentage cannot waive a hard stop.
Evidence_Requests	Update status, owner, due date, supporting document ID and independent reviewer; store sensitive originals only in approved PSS repositories, not the personal research archive.
Interfaces	Confirm exact P01/P02 requirement ID, actual ownership and interface permission; document current vs proposed, test criteria, security scope and unresolved decisions.
Threats	Enter contradictory evidence and possible failure mechanisms; assign a proposed owner; separate inherent risk, actual controls, residual assessment and management response.
Standards_Scope	Review the existing field labels; record dated factual evidence, explicit assumptions and open questions without overriding formulas or sign-offs.
Architecture_Decisions	Review the existing field labels; record dated factual evidence, explicit assumptions and open questions without overriding formulas or sign-offs.
Traceability	Confirm exact P01/P02 requirement ID, actual ownership and interface permission; document current vs proposed, test criteria, security scope and unresolved decisions.
Target_Metrics	Record test preconditions, authorised synthetic/controlled dataset, expected vs actual result, trace, tester, retest and sign-off. No executed test = Pending, not Pass.
Sources	Record exact primary/public URL or approved document reference, retrieval date, issuer, version, scope, and claim supported; revisit at decision time.

Workbook 13 — F03_Legal_Obligations_Gates_and_Evidence_Registers_v1.xlsx

Location: 04_Feasibility_and_Assurance/F03/F03_Legal_Obligations_Gates_and_Evidence_Registers_v1.xlsx

Actual sheet name	How to use this worksheet
Source Register	Record exact primary/public URL or approved document reference, retrieval date, issuer, version, scope, and claim supported; revisit at decision time.
Legal Obligations	Review the existing field labels; record dated factual evidence, explicit assumptions and open questions without overriding formulas or sign-offs.
Permission Perimeter	Review the existing field labels; record dated factual evidence, explicit assumptions and open questions without overriding formulas or sign-offs.

Actual sheet name	How to use this worksheet
Data Processing Map	Use to propose responsibilities/service levels; validate with PSS and bank process owners, record version and sign-off; customer/settlement accountability stays with authorised institutions.
Hard Legal Gates	For each existing gate, locate original proof and independent owner; move from Pending only after documentary review; a dashboard percentage cannot waive a hard stop.
Contract Controls	Update status, owner, due date, supporting document ID and independent reviewer; store sensitive originals only in approved PSS repositories, not the personal research archive.
Legal Questions	Review the existing field labels; record dated factual evidence, explicit assumptions and open questions without overriding formulas or sign-offs.
Evidence Requests	Update status, owner, due date, supporting document ID and independent reviewer; store sensitive originals only in approved PSS repositories, not the personal research archive.
Action Notebook	Update status, owner, due date, supporting document ID and independent reviewer; store sensitive originals only in approved PSS repositories, not the personal research archive.
Decision Log	After authority is confirmed, record decision ID, authorised reviewer, dated disposition, evidence link and remaining conditions; never invent a signature.
Dashboard	READ ONLY: review counts and warnings after updating linked registers; compare with raw evidence; do not type over calculated indicators.

Workbook 14 — F04_Two_Sided_Commercial_Economics_and_Validation_Workbook_v1.xlsx

Location:
04_Feasibility_and_Assurance/F04/F04_Two_Sided_Commercial_Economics_and_Validation_Workbook_v1.xlsx

Actual sheet name	How to use this worksheet
Dashboard	READ ONLY: review counts and warnings after updating linked registers; compare with raw evidence; do not type over calculated indicators.
Price Architecture	EDIT ONLY substantiated input cells; provide source/owner and units (ETB, month, bank). Keep formula cells intact and blank outputs when evidence is absent; have Finance independently reconcile and stress.
Actual Inputs	EDIT ONLY substantiated input cells; provide source/owner and units (ETB, month, bank). Keep formula cells intact and blank outputs when evidence is absent; have Finance independently reconcile and stress.
PSS Economics	EDIT ONLY substantiated input cells; provide source/owner and units (ETB, month, bank). Keep formula cells intact and blank outputs when evidence is absent; have Finance independently reconcile and stress.
Bank Economics	EDIT ONLY substantiated input cells; provide source/owner and units (ETB, month, bank). Keep formula cells intact and blank outputs when evidence is absent; have Finance independently reconcile and stress.

Actual sheet name	How to use this worksheet
Subscription Test	EDIT ONLY substantiated input cells; provide source/owner and units (ETB, month, bank). Keep formula cells intact and blank outputs when evidence is absent; have Finance independently reconcile and stress.
36 Month Cash	EDIT ONLY substantiated input cells; provide source/owner and units (ETB, month, bank). Keep formula cells intact and blank outputs when evidence is absent; have Finance independently reconcile and stress.
Buyer Evidence	Only after outreach approval/consent: log anonymised interview or test ID, participant category, actual quote/observation, source, date and evidence strength; do not enter fictional responses.
Price Tests	Only after outreach approval/consent: log anonymised interview or test ID, participant category, actual quote/observation, source, date and evidence strength; do not enter fictional responses.
Hard Gates	For each existing gate, locate original proof and independent owner; move from Pending only after documentary review; a dashboard percentage cannot waive a hard stop.
Evidence Requests	Update status, owner, due date, supporting document ID and independent reviewer; store sensitive originals only in approved PSS repositories, not the personal research archive.
Sources	Record exact primary/public URL or approved document reference, retrieval date, issuer, version, scope, and claim supported; revisit at decision time.
Decision Log	After authority is confirmed, record decision ID, authorised reviewer, dated disposition, evidence link and remaining conditions; never invent a signature.

Workbook 15 — F05_Investment_Model_Options_Stress_and_Approval_Registers_v1.xlsx

Location: 04_Feasibility_and_Assurance/F05/F05_Investment_Model_Options_Stress_and_Approval_Registers_v1.xlsx

Actual sheet name	How to use this worksheet
Dashboard	READ ONLY: review counts and warnings after updating linked registers; compare with raw evidence; do not type over calculated indicators.
Inputs	EDIT ONLY substantiated input cells; provide source/owner and units (ETB, month, bank). Keep formula cells intact and blank outputs when evidence is absent; have Finance independently reconcile and stress.
Bank Ramp	EDIT ONLY substantiated input cells; provide source/owner and units (ETB, month, bank). Keep formula cells intact and blank outputs when evidence is absent; have Finance independently reconcile and stress.
Monthly Cash	EDIT ONLY substantiated input cells; provide source/owner and units (ETB, month, bank). Keep formula cells intact and blank outputs when evidence is absent; have Finance independently reconcile and stress.
Annual Bridge	EDIT ONLY substantiated input cells; provide source/owner and units (ETB, month, bank). Keep formula cells intact and blank outputs when evidence is absent; have Finance independently reconcile and stress.

Actual sheet name	How to use this worksheet
Stress Cases	EDIT ONLY substantiated input cells; provide source/owner and units (ETB, month, bank). Keep formula cells intact and blank outputs when evidence is absent; have Finance independently reconcile and stress.
Stress Cash	EDIT ONLY substantiated input cells; provide source/owner and units (ETB, month, bank). Keep formula cells intact and blank outputs when evidence is absent; have Finance independently reconcile and stress.
Options	Score only with evidence at a common level of scrutiny; keep no-build as an alternative and mandatory eligibility gates separate from weighted ratings.
Bank Value Evidence	Only after outreach approval/consent: log anonymised interview or test ID, participant category, actual quote/observation, source, date and evidence strength; do not enter fictional responses.
Approval Gates	For each existing gate, locate original proof and independent owner; move from Pending only after documentary review; a dashboard percentage cannot waive a hard stop.
Cost & Evidence	EDIT ONLY substantiated input cells; provide source/owner and units (ETB, month, bank). Keep formula cells intact and blank outputs when evidence is absent; have Finance independently reconcile and stress.
Risks & Sensitivity	Enter contradictory evidence and possible failure mechanisms; assign a proposed owner; separate inherent risk, actual controls, residual assessment and management response.
Sources & Guide	START HERE: follow sheet guidance and input conventions; preserve this tab unchanged unless version-controlled.

Workbook 16 — F06_Independent_Challenge_Risk_Gates_and_Evidence_Registers_v1.xlsx

Location:
04_Feasibility_and_Assurance/F06/F06_Independent_Challenge_Risk_Gates_and_Evidence_Registers_v1.xlsx

Actual sheet name	How to use this worksheet
Dashboard	READ ONLY: review counts and warnings after updating linked registers; compare with raw evidence; do not type over calculated indicators.
Challenges	Review the existing field labels; record dated factual evidence, explicit assumptions and open questions without overriding formulas or sign-offs.
Gates	For each existing gate, locate original proof and independent owner; move from Pending only after documentary review; a dashboard percentage cannot waive a hard stop.
Risks	Enter contradictory evidence and possible failure mechanisms; assign a proposed owner; separate inherent risk, actual controls, residual assessment and management response.
Evidence	Update status, owner, due date, supporting document ID and independent reviewer; store sensitive originals only in approved PSS repositories, not the personal research archive.
Contradictions	Enter contradictory evidence and possible failure mechanisms; assign a proposed owner; separate inherent risk, actual controls, residual assessment and management response.
Alternatives	Score only with evidence at a common level of scrutiny; keep no-build as an alternative and mandatory eligibility gates separate from weighted ratings.

Actual sheet name	How to use this worksheet
Model QA	Review the existing field labels; record dated factual evidence, explicit assumptions and open questions without overriding formulas or sign-offs.
Independence	After authority is confirmed, record decision ID, authorised reviewer, dated disposition, evidence link and remaining conditions; never invent a signature.
Signoffs	After authority is confirmed, record decision ID, authorised reviewer, dated disposition, evidence link and remaining conditions; never invent a signature.
Source Index	Record exact primary/public URL or approved document reference, retrieval date, issuer, version, scope, and claim supported; revisit at decision time.
Programme Map	Review the existing field labels; record dated factual evidence, explicit assumptions and open questions without overriding formulas or sign-offs.
Action Book	Update status, owner, due date, supporting document ID and independent reviewer; store sensitive originals only in approved PSS repositories, not the personal research archive.
Read Me	START HERE: follow sheet guidance and input conventions; preserve this tab unchanged unless version-controlled.

Workbook 17 — 03_Action_and_V05_Evidence_Tracker.xlsx

Location: 05_Joining_and_Execution/V05_Notebook/03_Action_and_V05_Evidence_Tracker.xlsx

Actual sheet name	How to use this worksheet
Action Notebook	Update status, owner, due date, supporting document ID and independent reviewer; store sensitive originals only in approved PSS repositories, not the personal research archive.
V05 Data Requests	Update status, owner, due date, supporting document ID and independent reviewer; store sensitive originals only in approved PSS repositories, not the personal research archive.
V05 Metrics Calculator	Record test preconditions, authorised synthetic/controlled dataset, expected vs actual result, trace, tester, retest and sign-off. No executed test = Pending, not Pass.
Public Sources	Record exact primary/public URL or approved document reference, retrieval date, issuer, version, scope, and claim supported; revisit at decision time.
Decision and Meeting Log	Update status, owner, due date, supporting document ID and independent reviewer; store sensitive originals only in approved PSS repositories, not the personal research archive.
Approval Gates	For each existing gate, locate original proof and independent owner; move from Pending only after documentary review; a dashboard percentage cannot waive a hard stop.
Read First	Review the existing field labels; record dated factual evidence, explicit assumptions and open questions without overriding formulas or sign-offs.
Dashboard	READ ONLY: review counts and warnings after updating linked registers; compare with raw evidence; do not type over calculated indicators.

3 Detailed hands-on walkthroughs for high-impact workbooks

Master Control Register — Daily control

1. Read Read Me and inspect Dashboard; do not edit dashboard cells.
2. In Joining Workplan identify the next authorised work item and proposed owner.
3. In Evidence Gates record source locator + reviewer + decision for an exact gate ID.
4. In Audit Findings record remediation and retest status; keep source claims dated.
5. In Change Control open a request for any document edit, and in Decision Log record signed outcome.
6. Revisit Dashboard and make sure no gate counts changed without evidence.

V03 — Bank discovery

1. In Bank Pipeline enter a bank coded ID, permission status and prospective buyer category.
2. After approved consent, fill Interview Log with real dated observations.
3. For Buyer Evidence and Pricing and ROI record decision maker, baseline data and price ceiling with provenance.
4. In Sponsor Tracker record budget/authority evidence separately from encouragement.
5. Use QA and Gate + Dashboard to see unproven and negative buyer cases.

V04 — Merchant validation

1. Open Quotas to understand proposed sampling targets.
2. Log recruitment consent in Recruitment; use anonymised IDs in InterviewNotes.
3. Code specific pain in PainMatrix, not broad impressions.
4. Test concepts in ConceptTests using consistent wording and counterexamples.
5. Update Hypotheses and Evidence with source; use V02Change for market-report impacts.

V05 — Existing product performance

1. Read Read First before requesting anything internal.
2. On V05 Data Requests list authorised owner, date and classification for each dataset.
3. Only after actual measurement enter raw numerators/denominators in V05 Metrics Calculator; preserve formulas.
4. Track actual meeting permissions in Decision and Meeting Log and unresolved gate decisions in Approval Gates.
5. Treat dashboard values as derivative, not independent certification.

P01/P02 — Requirements and technical tests

1. In P01 Functional/NonFunctional record observed capability separately from proposed requirement.
2. Map Interface ownership and event vocabulary in P01 Interfaces then P02 Interfaces and EventFields.
3. Create/update P02 ADRs (architecture decisions), linking unresolved design concerns.
4. Execute authorised synthetic/controlled tests and log actual traces in Acceptance Tests/P02 Tests.
5. Escalate tenant-isolation, double-charge, reversal and settlement-confusion failures.

P03/P04 — Operating and sourcing

1. Validate P03 RACI and Handoffs with each proposed accountable institution.
2. Do not set SLAs_OLAs to contractual service commitments until approved.

3. For P04 apply Hard Gates before Scoring; request supplier evidence only after approved RFI.

4. Separate quoted TCO and benchmarked related-party supplier offers; preserve recusal and conflicts.

5. Record signed decisions and exit/data portability requirements in relevant registers.

F02/F03 — Technical and legal feasibility

1. Use F02 Test_Cases and Hard_Gates to track actual test outcomes, not planned tests.

2. Map exact standard scope under Standards_Scope and obtain current in-scope proof.

3. In F03 Permission Perimeter and Data Processing Map list actual parties, purpose, data, transfer, lawful bases and controls.

4. Record the original licence, contract/legal review in Hard Legal Gates; block live use until documented.

5. Keep Legal Questions open with dated counsel response and version.

F04 — Two-sided price economics

1. Start with actual bank cost baseline and cost-saving source; enter documented prices in Actual Inputs.

2. Use PSS Economics to check recurring service margin and Bank Economics to check buyer net value.

3. Use Subscription Test to compare price floor and buyer ceiling without inventing contract interest.

4. Use 36 Month Cash for implementation and working-capital effects; preserve zero-bank fixed costs.

5. Leave Hard Gates pending unless actual buyer evidence and verified operating costs are present.

F05 — Capital allocation

1. Check Inputs: ETB units, nominal vs real, calendar horizon and the original evidence for each figure.

2. Fill Bank Ramp with supported contracted or weighted verified timing; distinguish unsigned pipeline.

3. Check Monthly Cash in zero-bank months; fixed OPEX must remain.

4. Review Annual Bridge, Stress Cases and Stress Cash including delay/FX/cost overrun.

5. Compare all alternatives in Options on same accounting, funding and hurdle bases.

6. Do independent CFO model check; do not mark Approval Gates cleared from formulas alone.

F06/F01 — Independent challenge and decision

1. Commission independent reviewers only with proper authority and declared independence.

2. In F06 Challenges and Contradictions preserve adverse source evidence.

3. Complete Model QA with independent re-performance, not author-only assertions.

4. Populate Signoffs only after signed reviewer records; unresolved concerns remain visible.

5. Use F01 Decision Gates, Evidence Backlog and Strategic Options to synthesise actual conditions.

6. Reissue F01 only when the reviewer and management decision record is complete.

4 Finance example — missing inputs vs genuine zero

EXAMPLE ONLY: a first-month bank count of zero may be a valid forecast assumption if grounded in a documented launch plan; fixed operating expenditure and cybersecurity costs should still flow into F05 Monthly Cash. In contrast, an empty proposed bank price or missing supplier quotation means the model is incomplete, NOT that the price or cost is zero. Never fill “0” just to obtain a displayed NPV or gate percentage.

5 Safe input sequence and formula check

1. Record data-source ID and permission before typing source values.
2. Validate units, period, sign and bank/customer scope against source.
3. Enter actual values only in specified input cells; do not paste across formulas.
4. Check reconciliation/roll-up totals and negative cases manually.
5. Check #REF!, #VALUE!, #DIV/0!, and #NAME?; resolve before reporting.
6. Review dashboard counts and meaningful blanks; preserve failure cases.
7. Request independent calculation check and evidence-scope acceptance.
8. Export a dated review copy; never replace canonical master without approved version management.

6 Worksheet review record — reusable QA template

Field	Record before changing a gate or publishing outputs
Workbook / worksheet / version	[Exact source workbook, actual tab name, working-copy version]
Purpose and authority	[Approved mandate; research, calculation or actual test]
Changed input cells	[Cell/range, units, source ID, date and original value if corrected]
Protected computations	[Formula cells untouched or documented change request]
Quality checks	[Checks for blanks, zeros, formula errors and totals]
Independent reviewer	[Name/role, scope, date; leave blank if not reviewed]
Decision	[No gate cleared without original proof and delegated sign-off]
